Our equipment room is highly secure and well ventilated to help keep gear safe and dry. Your gear is cared for and when you are ready for a dive our staff will prepare everything for the dive whether it's a shore dive at our house reef or from our boat.

Dive briefings will be held at either the equipment room or on the boat. For the novice or beginner we can offer instruction to get you going or further your dive skills.

Photographers and videographers are well cared for from our camera room to large rinse tanks both in the dive shop and on the boat. We provide a number of tables to set your wet gear on while it drains. Our crew is trained in how to handle camera equipment. Camera charging facilities are provided in both 110 & 220 voltage.

If you arrive without your dive gear or are just beginning, we have great quality rental gear on hand.

Our L&W compressor and O2 station provide safe, clean air or Nitrox. All our tanks are aluminum with either yolk or DIN valves.

OSLOB WHALE SHARK TRIP

The fishermen of Tan-Awan near Oslob discovered in 2011 that the whale sharks coming daily to feed on their by-catch thrown off the boats close to shore were a big tourist attraction. They started inviting divers to come and see the whale sharks this soon grew into a small tourist attraction. Soon after, the government sanctioned the feeding of the whale sharks in Tan-Awan, and tourism in the area has boomed.

There is a well-organized system that allows tourists and locals alike to experience time in the water with these gentle giants. While at the same time giving them some information about the conservation efforts surrounding the whale sharks.

Whale sharks are the largest fish in the ocean, and can grow up to 12 meters (40 feet) in length. In Oslob, most of the whale sharks commonly seen are approximately 5 meters long – they are only juveniles! Marine scientists study the creatures daily to ensure that they are being kept healthy and safe amidst the feeding, and also to try and learn more about these magnificent creatures we know so little about.

There are 2 options for this trip - dependant upon weather, availability and your preference!

Depart at 5.30 am on Laya, our luxury dive boat and travel to to Oslob to snorkel with the Whale Sharks. Following your snorkel at Oslob, Laya will cruise to Sumilon Island where you'll enjoy a lovely lunch onboard, and your first dive of the day (optional). After the dive, Laya travels back to Negros Island, where we'll stop at one of our favorite dive sites called Mainit. The divers will be treated to an excellent drift dive. Not always running but still an excellent dive site if the currents prove calm upon arrival. This is not a site for snorkelers.

Alternatively, you can travel directly to Oslob by air-conditioned van, where you can snorkel with the whalesharks and eat a picnic brunch prepared by the Salaya chefs, before heading back to the resort. This is still a great day out, and preferable if the seas between Salaya and Oslob are not so calm.
